📍 Toronto, Canada

Profile

I'm a Software Engineer based in Toronto, Canada. I'm a co-creator of Stagehand ⬀, a drop-in review apps service for frontend applications. I have multiple years of experience with both the JavaScript and Ruby ecosystems. I am also comfortable with cloud services such as AWS.

Skills

Backend
Node.js, Express, Ruby, Rails, Sinatra, PostgreSQL, MongoDB, RESTful APIs

Frontend
JavaScript, React/Redux, HTML/CSS, JQuery

Tooling
Git, Linux, VPS

Cloud
AWS, Digital Ocean, Heroku

Professional Experience

Co-Creator, Software Engineer, Stagehand ⬀   2020 – present

- Co-created Stagehand, an open-source review apps service for frontend applications
- Prototyped and built the infrastructure needed by stitching together AWS and GitHub Actions
- Utilized GitHub Actions to automatically set up and tear down review apps in response to events
- Designed cloud infrastructure on AWS to host frontend review apps
- Implemented review apps wrapper to provide customizable dashboard using Service Workers and client-side code.
- Built an intuitive CLI for the user-interface and collaboration across multiple devices
- Co-authored Stagehand's case study: Stagehand ⬀
- Collaborated daily with a fully remote team of engineers

Full-stack Web Developer, Self-Employed   2018 – present

- Mello: Trello-like collaboration board built with Rails and React/Redux
- Water Scheduler: Keep track of your plants, built with Ruby and Sinatra
- World Chat: Multi room chat app over websockets hosted on a VPS, built with Node.js/React
- Request Bucket: Request Bin-like tool to receive and inspect request payloads, built with Express JS, MongoDB, and PostgreSQL. Set up on a VPS
- Project Manager: Rails API to manage projects, users, and auth, with an RSpec test suite.

Event Manager, Oliver & Bonacini ⬀   2015 – 2020 | Toronto, Canada

- Managing massive, high-end events such as TIFF, Human Right Watch, Wedluxe.
